

STRONG High Seas Capacity Development Series

The EVENT:

The [STRONG High Seas project](#) will be running a series of virtual capacity development workshops through 2021. The first of the series was held in June and introduced participants to the United Nations Law of the Sea and Biodiversity Beyond National Jurisdiction. The third interactive virtual workshop will introduce you to the **socio-economic importance of Areas Beyond National Jurisdiction (ABNJ) to countries in the Abidjan Convention Region**. We will introduce you to **Environmental Impact Assessments and their relevance to Areas Beyond National Jurisdiction**. These themes are under discussion as part of the BBNJ negotiations; we will see what the current status of the negotiation text is and we will discuss the various opportunities and challenges for African countries to implement these tools into national legal frameworks.

The Socio-economic importance of Areas Beyond National Jurisdiction (ABNJ) and Environmental Impact Assessments (EIA) in the context of ABNJ

12:00 – 15:30 Abidjan Time * 14:00 - 17:30 South African Time (SAST)

Simultaneous translation will be available in English and French

Abidjan Time	SAST/CET	Wednesday 6 th October 2021		
12:00 -12:10	14:00 – 14:10	Introduction to the STRONG High Seas capacity development series	Shannon Hampton	IOI-SA
12:10 -13:30	14:10 – 15:30	The socio-economic importance of ABNJ to the Abidjan Convention Region	Claudette Spiteri	MCL
13:30 – 13:45	15:30 – 15:45	Short break		
13:45 – 15:15	15:45 – 17:15	What are EIAs and SEA and how can they be implemented in ABNJ	Meinhard Doelle	WMU
15:15 – 15:30	17:15 – 17:30	Closing	Shannon Hampton	IOI-SA

[Please register by clicking here. We will consider your participation based on the availability of spaces. Priority will be given to representatives and stakeholders from the Abidjan Convention area.](#)

The Series:

- An introduction to the United Nations Law of the Sea and Biodiversity Beyond National Jurisdiction negotiations (held on 17 & 18 June 2021)
- Understanding the Ecology and human pressures in Areas Beyond National Jurisdiction and Area-based Management Tools (including Marine Protected Areas). (25 August 2021)
- **The Socio-economic importance of Areas Beyond National Jurisdiction (ABNJ) and Environmental Impact Assessments (EIA) in the context of ABNJ**
- Understanding Marine Genetic Resources (upcoming)
- Conservation and Sustainable Use of resources in Areas Beyond National Jurisdiction (upcoming)

A certificate will be issued to all those who participate in a minimum four of the events in the series.

Target Audience:

We welcome anyone with an interest in Biodiversity Beyond National Jurisdiction, with particular focus on the Abidjan Convention Region. We hope that the series will provide the participants with tools and knowledge to share with their colleagues and across national departments to help the countries of the Abidjan Convention to enhance ocean governance in the region and implement the BBNJ treaty in their national context after its ratification.

About STRONG High Seas

The STRONG High Seas project is a five-year project that aims to strengthen regional ocean governance for the conservation and sustainable use of marine biodiversity in areas beyond national jurisdiction. Working with the Secretariat of the Comisión Permanente del Pacífico Sur (CPPS; Permanent Commission for the South Pacific) and the Secretariat of the West and Central Africa Regional Seas Programme (Abidjan Convention), the project will develop and propose targeted measures to support the coordinated development of integrated and ecosystem-based management approaches for ocean governance in areas beyond national jurisdiction.

The STRONG High Seas project has the following overarching objectives:

1. Facilitate the development of improved management approaches for the conservation and sustainable use of biodiversity in areas beyond national jurisdiction in the Southeast Pacific and Southeast Atlantic regions;
2. Identify best practices and provide support to regional institutions and national authorities for implementing existing regional instruments;
3. Develop options for regional governance in a future international instrument under UNCLOS and transfer regional lessons learned to the global level to promote ocean governance.
